

5-DIFF HEMATOLOGY ANALYZER (RAYTO Hemaray 83)

Price: GHS95,000

Features:

- 28 Parameters, 2 Histograms, 2 Scattergrams
- 60 samples/hour
- 3-D Topographic Maps for WBC
- Integral Titanium Incubation System
- 2 test modes & 2 sample modes
- Laser Scatter Technology
- Constant Linear Sheath Flow
- Cyanide Free reagent

5-DIFF HEMATOLOGY ANALYZER (RAYTO HEMARAY 86)

Price: GHS98,500

•
•
•

Features:

- 28 Parameters, 2 Histograms, 2 Scattergrams
- Auto-loader, 60 samples/hour
- 3-D Topographic Maps for WBC
- Integral Titanium Incubation System
- Laser Scatter Technology
- Constant Linear Sheath Flow
- Random Direction Tube Barcode Scanning Technology (Optional)

AUTO CHEMISTRY ANALYZER (RAYTO CHEMRAY 120)

Price: GHS62,500

Features:

- Automatic, Random Access
- Up to 100 tests per hour
- Reagent pre-heating, liquid level detection
- Labor saving, simple programming and real walk-away operation
- Micro-volume for sample and reagent
- User-friendly software, simplicity and flexibility for operation
- Multi-language software supported

Lumiray 1200

Auto Chemiluminescence analyzer

Price: GHS120,500

- Fully automated, random access, STAT priority
- Advanced CLIA technology:
 - ☆ Enzymatic chemiluminescence principle
 - ☆ Glow-type luminescence
 - ☆ ALP-AMPPD system, and up to 10^{-21} mol/L high detection sensitivity
 - ☆ Independent magnetic separation washing system, cleanser pre-heating function
- Throughput up to 120 tests/hour
- 60 sample positions, 24 reagents set position with 24-hours refrigeration
- Continuous cuvettes loading
- Auto dilution, liquid level detection, collision protection, clot detection
- Bi-direction LIS system
